PROFESSIONAL PROFILE

Results-oriented software developer with 5+ years of combined professional and project-based experience delivering scalable web applications and reliable infrastructure solutions. Specializes in React, Next.js, Node.js, and the MERN stack, with a record of successful remote client delivery, performance optimization, secure API design, and enterprise systems support. Top Rated on Upwork with 100% positive client feedback.

TECHNICAL EXPERTISE

Front End: React.js, Next.js, TypeScript, Redux

Back End: Node.js, Express.js, Python, REST APIs

Data & DevOps: MongoDB, PostgreSQL, Docker, AWS

Systems: RHEL, AIX, Nutanix, Oracle connectivity

Delivery: Performance optimization, payments, integrations, scalable architecture, role-based access control

PROFESSIONAL EXPERIENCE

Cloud and Core System Administrator | Dashen Bank

December 18, 2024 - Present

- Manage critical and non-critical processes.
- Systems and storage capacity management.
- System planning, security, and software management.
- Upgrade infrastructure components.
- Administer service requests.
- Monitor cloud systems.
- Design disaster recovery solutions.
- Create technical documentation.
- Maintain system security.
- Capacity planning.
- Monitor application health.
- Recommend architecture improvements.

Senior Full-Stack Developer | Freelance / Upwork

2022 - Present | Remote

- Delivered 15+ complex full-stack projects for international clients, maintaining a 5.0-star rating, Top Rated status, and 100% positive feedback.
- Improved client web performance by up to 40% by modernizing legacy codebases with React.js, effective state management, and responsive UI patterns.
- Designed secure RESTful APIs and integrated third-party services, including AWS and Stripe, to support dependable business workflows and payments.

Full-Stack Developer Intern | Andinet International College

2023 - 2024

- Developed the institution's official web platform with React and Node.js, enabling dynamic content delivery and stronger user engagement.
- Built an integrated student-management system with automated administrative workflows and role-based access control.

Systems & Infrastructure Analyst Intern | AAU Data Center

2023 - 2024

- Supported Red Hat Enterprise Linux server environments and Oracle database connectivity for high-reliability operations.
- Assisted virtual-server cutover and migration to Nutanix environments, contributing to high availability and uninterrupted service.

SELECTED PROJECTS

EthioHire Recruitment Ecosystem: Full-stack recruitment platform that streamlines industrial hiring through advanced candidate filtering and real-time dashboards.

Enterprise E-Commerce Suite: Scalable MERN application with inventory-management workflows and integrated payment gateways.

Web Platform & Student Management System: React and Node.js platform for dynamic institutional content, workflow automation, and role-based access.

Infrastructure Modernization Support: RHEL, Oracle, and Nutanix-focused operational support for resilient enterprise environments.

EDUCATION & CREDENTIALS

B.Sc. Information Systems | Addis Ababa University

Certifications: Professional Certificate in Cybersecurity | Advanced Database Systems Trainer
